After approximately 15 minutes suddenly there was another loud boom at the upper floors, then there was a series of smaller explosions which appeared to go completely around the building at the upper floors. And another loud earth-shattering blast with a large fire ball which blew out more debris and at that point everyone began to run north on West Broad Street.”**

I looked up to the roof of the Woolworth building and there appeared to be smoke coming from the very top of the building. At this time Detective deMello and myself ran to the Woolworth building. As we entered I immediately asked for the head of security. An un-identified black male in a security uniform ran forward and asked how he could help. I told him I needed a secure elevator to the roof, his response was “follow me”. We walked to a bank of elevators when the doors of one car opened. Two men stepped out of the elevator. A man appearing to be Hispanic identified himself as the building superintendent; he was wearing an ID card on his shirt. The security guard seemed to know him so we took him at his word. He advised Detective deMello and myself that the roof was secure. I told him that we had a report that a missile had been fired from the roof of this building and he advised us that it wasn't a missile it was an aircraft, a big aircraft. He further advised that he was on the roof when it crashed into Tower Two. At this time we left the building and started to run back towards the Barclay Street ramp.”**

well, the government COULDN'T be wrong...I mean, they never are. Bureacrats have special secret powers.

Naturally, this means all of those transcripts are false, or all the emergency workers were wrong.
